Outcomes of the Event : <ul style="list-style-type: none"> This program aims at providing an opportunity for participants to enrich their knowledge and skill in developing various solutions for solving engineering problems in the society. Augmented reality, in which virtual content is seamlessly integrated with displays of real-world scenes, is a growing area of interactive design. With the rise of personal mobile devices capable of producing interesting augmented reality environments, the vast potential of AR has begun to be explored. The webinar described the current state-of-the-art in augmented reality. It describes work performed in different application domains and explains the exiting issues encountered when building augmented reality applications considering the ergonomic and technical limitations of mobile devices. 	
Remarks and Feedback on the Event : <ul style="list-style-type: none"> The overall session discussion benefited the faculties and students. This webinar would help the participants to do their implementation in research work.
