Name of the Faculty : ¹ Dr. Karthikeyan P N , ² Mr. Saravana Kumar V	
Department : Aeronautical Engineering	Designation : ¹ Professor ² Assistant Professor
Name of the Event : Skill and Entrepreneurship Development Program under Nurture Program Scheme on "Intelligent Drone System"	
Level : College Level	
Venue : Ganga Hall, Drone CoE and UAV Lab	
No. of Days : 01	Dates: 22.01.2025 to 27.01.2025
Supported by : IHFC (I-Hub Foundation for Cobotics (IHFC), IIT Delhi, an Initiative of DST/ Ministry of S&T, Govt. of India.	
No. of Participants : 167	Registration charges (if any) : -
Name and Designation of Resource Person(s) : 1. Johan sundar U – Trainer 2. Ashmitha V - Trainer 3. Gayathiri N – Manager, Jet Aerospace Aviation Research Centre, Kanjikode, Kerala	
Objective: The Skill and Entrepreneurship Development Program under the Nurture Program Scheme on "Intelligent Drone System" aims to equip participants with the knowledge, technical skills, and entrepreneurial mind-set required to design, develop, and deploy advanced drone systems for various applications.	
Outcome : • Technical Skills in Drone Technology • Application of Intelligent Drone Systems • Entrepreneurship and Business Development • Compliance with UAV Regulations and Safety	
Remarks and Feedback on the Event: The Training offered significant value to attendees, particularly those considering a career in drone technology. It provided a clear picture of the skills and knowledge needed to succeed in this industry, along with an understanding of the various career paths available.

Name of the Faculty : Ms.N.Gomathi	
Department : Computer Science and Engineering	Designation : Assistant Professor
Name of the Event : Driving innovation with AI: A Game – Changer for Engineers organized / participated	
Level : College Level	
Mapping with UN SDGs (Tick the relevant) : No poverty (SDG 1), Zero hunger (SDG 2), Good health and well-being (SDG 3), Quality education (SDG 4), Gender equality (SDG 5), Clean water and sanitation (SDG 6), Affordable and clean energy (SDG 7), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Reduced inequalities (SDG 10), Sustainable cities and communities (SDG 11), Responsible consumption and production (SDG 12), Climate action (SDG 13), Life below water (SDG 14), Life on land (SDG 15), Peace, justice, and strong institutions (SDG 16), and Partnerships for the goals (SDG 17).	
Venue / Mode : Kurinji Hall	
No. of Days : 1	Date : 24.01.2025
Funded by & Amount : -	
No. of Participants : 140	Registration charges (if any) : Nil
Name and Designation of Resource Person(s) : Mr. Steve Bakther , NuStartz, CEO/ CO – Founder	
Outcome : 1. Students gained foundational knowledge of artificial intelligence and its applications in various engineering domains. 2. Students learned how AI is transforming fields such as mechanical, electrical, civil, and computer engineering through case studies and industry examples. 3. The session gives updated information to students on current and future trends in AI-driven engineering technologies, including smart manufacturing and automation.

Report for Beyond the Degree: The Entrepreneurial Journey

organized / participated

Name of the Faculty : Dr M NIRMALA	
Department : MCA	Designation : Assistant Professor
Name of the Event : Beyond the Degree: The Entrepreneurial Journey	
Level : Department Level	
Mapping with UN SDGs (Tick the relevant) : No poverty (SDG 1), Zero hunger (SDG 2), Good health and well-being (SDG 3), Quality education (SDG 4), Gender equality (SDG 5), Clean water and sanitation (SDG 6), Affordable and clean energy (SDG 7), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Reduced inequalities (SDG 10), Sustainable cities and communities (SDG 11), Responsible consumption and production (SDG 12), Climate action (SDG 13), Life below water (SDG 14), Life on land (SDG 15), Peace, justice, and strong institutions (SDG 16), and Partnerships for the goals (SDG 17).	
Venue / Mode : Hindusthan College of Engineering and Technology— Kurinji Hall/Offline	
No. of Days : Half day	Dates : 28.04.2025 -10.00 AM TO 1.00 PM
Funded by & Amount : Nil	
No. of Participants : 82	Registration charges (if any) : Nil
Name and Designation of Resource Person(s) : Mr.S.Karthik Raj MCA ., MBA Greenick Cottage Industry Greenick Foundation Proprietor	
Outcome : The workshop, led by Mr. S. Karthikraj, effectively distinguished entrepreneurship from business , highlighting the former's focus on new ideologies, growth, and continuous learning , in contrast to business's primary goal of profit . Students gained valuable insights into the mindset of an entrepreneur , understanding that success is an ongoing journey with no definitive end. This empowering experience equipped them with the knowledge and confidence to pursue careers in entrepreneurship.	

Remarks and Feedback on the Event:

- ☐ Overall Satisfaction: The majority of students (31 "Excellent," 25 "Very Good") were highly satisfied with the seminar, indicating a very positive experience.
- ☐ Relevance and Content: The seminar's content was widely perceived as relevant to their goals and needs, with strong positive feedback (22 "Excellent," 25 "Very Good").
- ☐ Engagement and Clarity: Students found the seminar engaging and interactive (25 "Excellent," 25 "Very Good"), and the information presented was largely clear and understandable (28 "Excellent," 25 "Very Good").
- ☐ Appropriate Length: The length of the seminar was considered appropriate by most participants, with a significant number rating it as "Excellent" (32) and "Very Good" (25).

Outcome :

- Students gain a better understanding of intellectual property concepts such as patents, copyrights, trademarks, and trade secrets, and their importance in innovation and research.
- The event can motivate students to innovate and develop original ideas, knowing that their intellectual property can be legally protected
- Students learn about the legal procedures to protect their work and the ethical implications of respecting others' intellectual property.
- Exposure to IPR enhances skills in documentation, legal awareness, and entrepreneurship, potentially opening up career paths in R&D, law, and startup ecosystems.

Dear Student,

Give your feedback on the level of relevance of the programme attended with respect to the following Program Outcomes (POs) and Program Specific Outcomes (PSOs).

Program Outcomes (POs)	Excellent	Good	Fair
1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems		✓	
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences			✓
3. Design / development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consideration		✓	
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions	✓		
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations		✓	
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice			✓
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development			✓
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice	✓		
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings		✓	
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions	✓		
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments	✓		
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change	✓		
Program Specific Outcomes (PSOs)	Excellent	Good	Fair
1. Apply the knowledge of unit processes and operations in Chemical and Allied Industries.		✓	
2. Implement the chemical engineering knowledge for process safety and ethically addressing the environment issues.		✓

2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences	✓		
3. Design / development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consideration		✓	
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions		✓	
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations	✓		
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice	✓		
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development	✓		
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice		✓	
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings		✓	
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions		✓	
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments		✓	
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change		✓	
Program Specific Outcomes (PSOs)	Excellent	Good	Fair
1. Apply the knowledge of unit processes and operations in Chemical and Allied Industries.	✓		
2. Implement the chemical engineering knowledge for process safety and ethically addressing the environment issues.		✓

Dear Student,

Give your feedback on the level of relevance of the programme attended with respect to the following Program Outcomes (POs) and Program Specific Outcomes (PSOs).

Program Outcomes (POs)	Excellent	Good	Fair
1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems		✓	
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences		✓	
3. Design / development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consideration		✓	
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions	✓		
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations	✓		
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice	✓		
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development	✓		
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice		✓	
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings		✓
