Name of the Faculty: Ms.M.Deeparani AP/BME, Dr.T.Murugeswari ASP/BME	
Department: Biomedical Engineering	Designation: Assistant and Associate Professors
Name of the Event: SoftSkill and Personality Development Program	
Level: College Level	
Venue / Mode: Offline	
No. of Days :1	Dates: 17.08.2022
Funded by: Nil	
No. of Participants :167	Registration charges (if any): nil
Faculties 8	
Students 159	
Externals Nil	
Name and Designation of Resource Person(s): Mr.Leander Wilfred A, Language Trainer & Education Co-Ordinator, Future-Ed Academy. Coimbatore – 641017.	
Objective: The course aims to cause a basic awareness about the significance of soft skills in professional and inter-personal communications and facilitate an all- round development of personality.	
Outcome: The soft skills training provides strong practical orientation to the students and helps them in building and improving their skills in communication, the effective use of English, Business correspondence, presentations, team building, leadership, time management, group discussions interviews, and inter personal.	
Remarks and Feedback on the Event: The students gave very good feedback, they grasped your “thinking” and “execution up to the point” of the event correctly to be complete. They got awareness about how to improve their soft skills and personality development; it would be close to impossible for you to achieve that.	
Plan of Implementing in HiCET (if any): Many programs related to soft skills and personality development will be conducted in future.

ABOUT THE INSTITUTION:

Hindustan college of engineering and technology is situated at Othakkalmanjaram on the Coimbatore Palakkad highway with the picturesque mountains in the backdrop. The college is separate over a sprawling campus with calm surroundings, creating a fitting atmosphere for study and provides a clean and invigorating environment conducive for higher education.

The primary objective of the Hindustan college of engineering and technology is to cater the needs of the nation in the development of technocrats and to provide facilities for educating and training men and women to meet the entrepreneurial and management needs. The college has been accredited by Nish & with A grade by NAAC.

An educational institution is a place where people of different ages gain an education. They provide a large variety of learning environments and learning spaces. We at HiCet believe not only in educating the students, but also grooming characters with moral ethical values.

ABOUT THE DEPARTMENT:

The Department of Biomedical with its cohesive team of faculty members, offers a sound program at the UG levels. The curriculum is the blend of conventional and the modern. It is updated regularly to keep up with the growing demands and the changing trends of the medical industry. The Department is witnessing a period of exciting growth and the opportunity provided by the growth of technology and its recognition in its excellence.

Our college infrastructure is sufficiently robust, scalable and efficient to deliver the integrated services underlying the physical environment that supports the processes, physical resources, and operations required for developing, integrating, operating, and sustaining IT applications and support services.

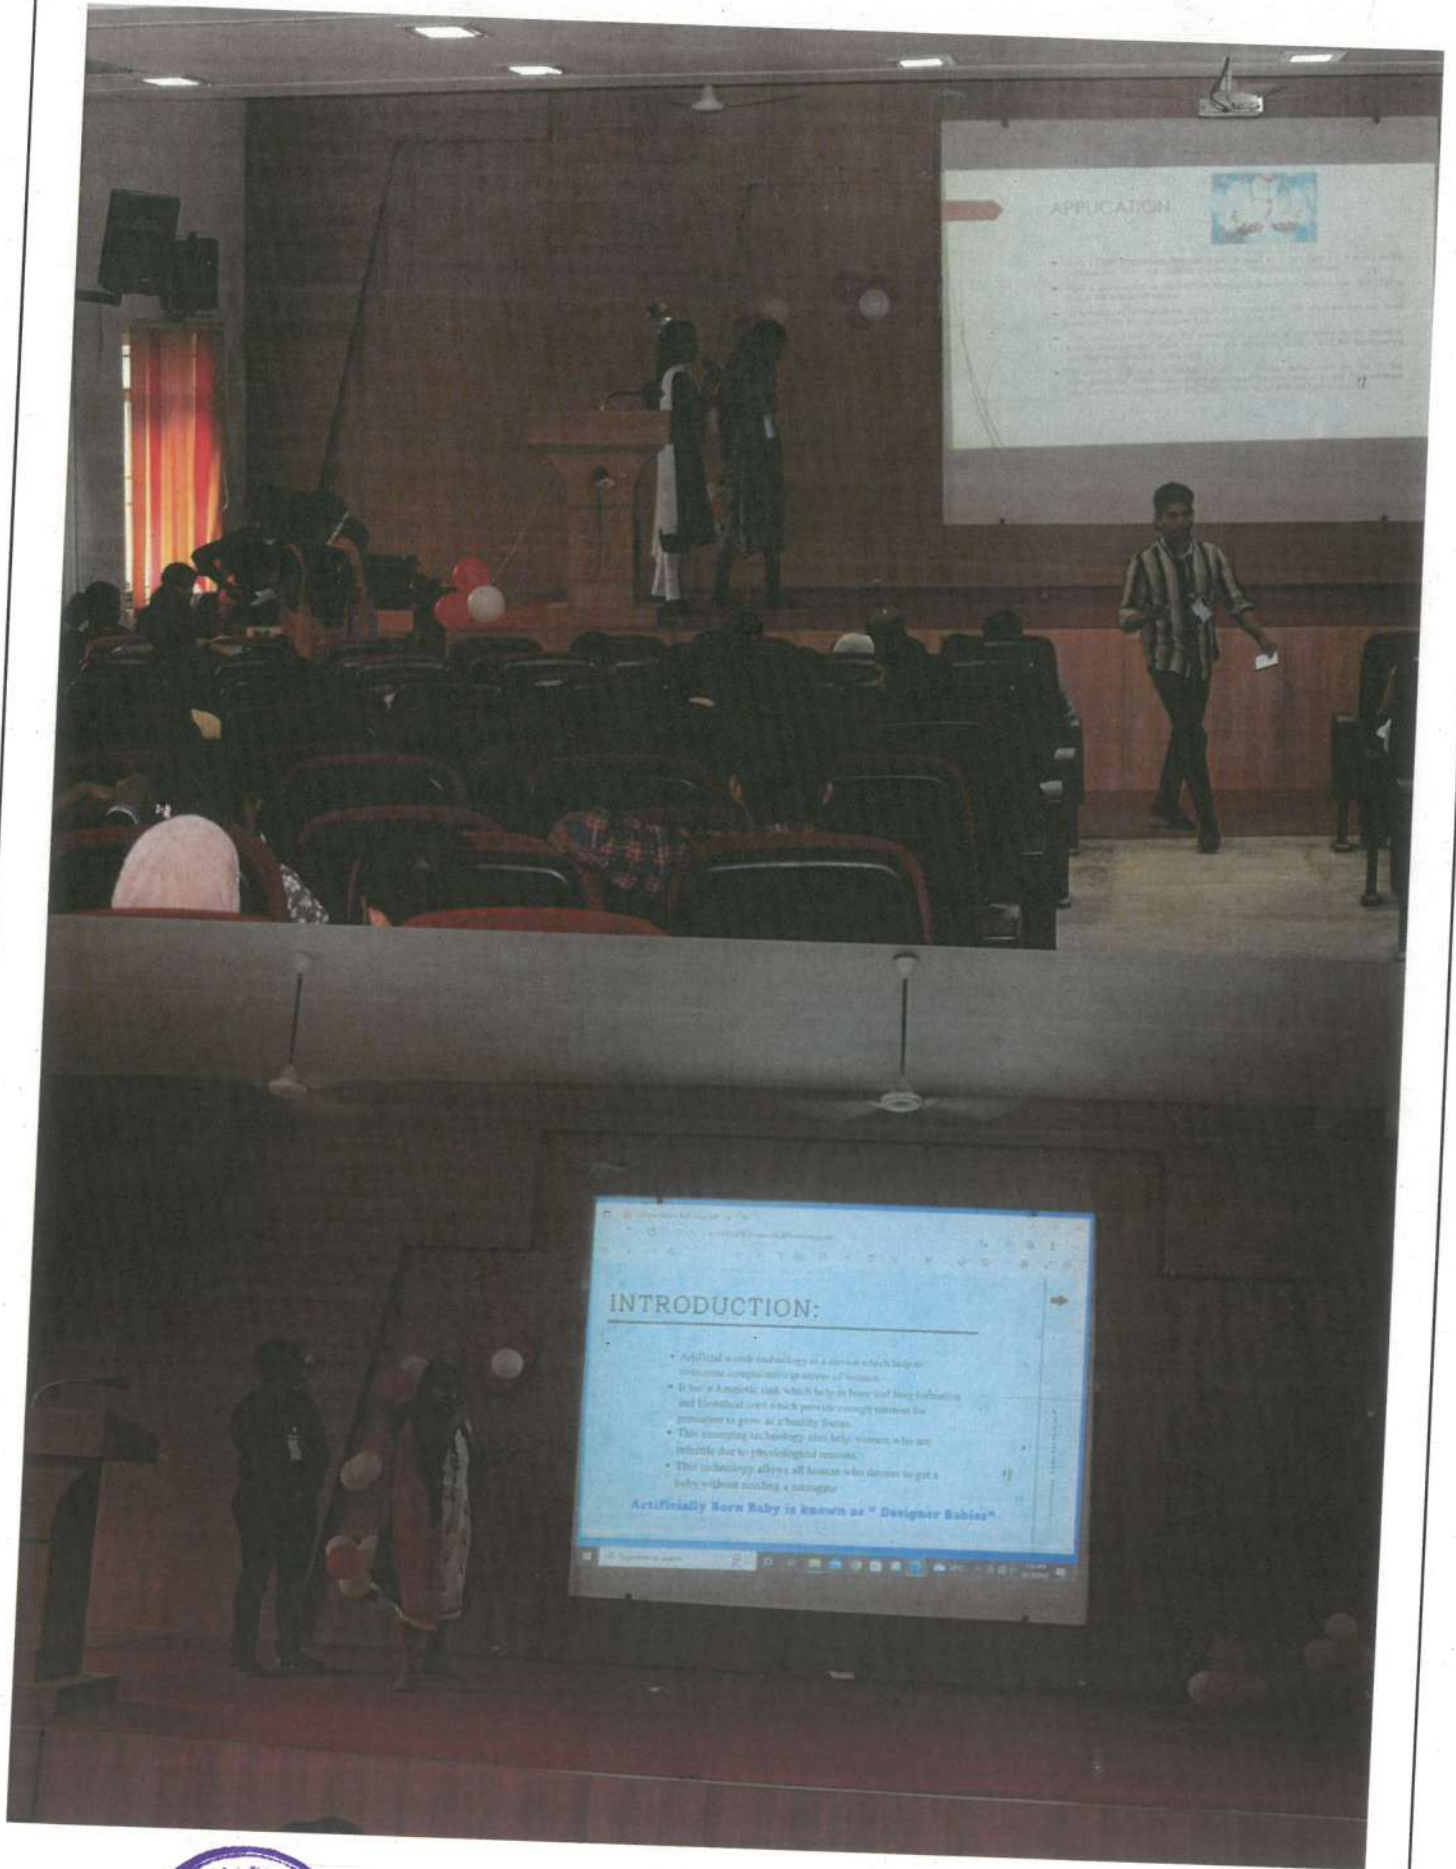

Course curriculum
The curriculum includes both high- and software languages and the concept about the core technologies. Management studies for making an efficient professional students or also included in the course curriculum.

INTRODUCTION:

- Artificial womb technology is a device which helps in creating complete or up to seven of human.
- It has an Amniotic fluid which helps in fetal development and blood flow which provides enough nutrients for progenitor to grow at a healthy pace.
- This emerging technology also helps women who are infertile due to physiological reasons.
- This technology allows all women who desire to get a baby without needing a surrogate.

Artificially Born Baby is known as "Designer Babies"

HINDUSTHAN
COLLEGE OF ENGINEERING AND TECHNOLOGY
(An Autonomous Institution)
Valley Campus, Pollachi Highway, Coimbatore - 641032

Five Days Online Faculty Development Program on "Radiological Equipments"

8th May 2023 to 12th May 2023

Organized by
DEPARTMENT OF BIOMEDICAL ENGINEERING

Conducted by
Hindusthan
College of Engineering and Technology,
(An Autonomous Institution)
Valley Campus, Pollachi Main road
Coimbatore - 32.

ABOUT THE INSTITUTION

Hindusthan College of Engineering and Technology (HICET), is an autonomous institution approved by AICTE, and is affiliated to the Anna University, Chennai. The Institution was established in the year 2000. HICET is one of the first autonomous technical institution imparting quality technical education and is NBA accredited with ISO 9001:2015 certified and NAAC certified with "A" grade. The Hindusthan Educational and Charitable Trust known for its vision, dynamism and philanthropy are run under the eminent and praiseworthy leadership of Shri T.S.R.Khanna, Chairman, Smt. T.R.K. Sarawathi, Secretary, and Dr. K.Priya, Executive Secretary. HICET is currently offering 15 UG and 7 PG Programmes in Engineering, Technology and Applied Sciences.

ABOUT THE DEPARTMENT

The Department of BME is devoted to establish innovative biomedical solutions to improve healthcare and well-being of people all over the world. Biomedical Engineering is the application of various engineering principles and technology to medicine and biology for bettering the lives of people all over the world. It focuses on integrating the healthcare field with the problem solving and designing skills of engineering principles that bridging medical science and engineering disciplines. Biomedical Engineering is a multi-disciplinary course with many opportunities for research and specialization. It involves studying all types of engineering ranging from electronics, computers, mechanical, chemical and Nano technology.

OBJECTIVE OF THE WORKSHOP

The five days online faculty development program on Radiological Equipments provide knowledge about

- Fundamentals of Radiological Equipments with insights into the Recent AI Era
- X-Ray, CT, MRI
- Digital Radiography

• Fluoroscopy and Mammography
• Imaging modalities in Nuclear Medicine
• Radio Diagnostics and Radiation Therapy
• Radiation Safety and Protection

ELIGIBILITY OF PARTICIPANTS

The FDP is open to all eligible Faculty members and Research Scholars from approved AICTE and ANNA UNIVERSITY affiliated institutions.

RESOURCE PERSONS

Day 1 - 08.05.2023
Mr. D. SIVAKUMAR
Assistant Professor & Head Medical Physics
Dr.N.G.P. Ann and Science College,
Coimbatore
Topic: Nuclear Medicine

Day 1-08.05.2023
Dr.M.KALAMANI
Associate Professor
KPR Institute of Engineering and Technology
Coimbatore
Topic: MRI scanner and Its Applications

Day 2 - 09.05.2023
Dr.C.SENTHAMIL SELVAN
Lecturer cum RSO,
FAHS & Dept of Radio-Diagnosis,
MGMCRI, Puducherry
Radiation Safety Teaching for B.Sc.
MIT & M.D (RD) and Research
Topic: Fundamentals of Radiological Equipment with Insights into the Recent AI Era

Day 2 - 09.05.2023
Dr. N. SANDAKUMAR
Proprietor - Bio Medical Systems,
PRIME BIO MEDICAL SYSTEMS,
Tiruppur
Topic: Current Trends in Radiological Equipment and Its Application

Day 3 - 10.05.2023
Mr.DHAKSHINAMOORTHY
PROPRIETOR,
Medupers Healthcare Solutions
Erode
Topic: Application of X ray in modern Prognosis

Day 3 - 10.05.2023
Ms. SREEPADMINI R
Assistant Professor
PSG College of Technology,
Coimbatore
Topic: Clinical Applications of Dynamic Digital Radiography

Day 4 - 11.05.2023
Prof. A.THIRUGNANAM
Associate Professor,
Biotechnology and Medical Engineering
National Institute of Technology,
Rourkela
Topic: Radiation Therapy for Cancer

Day 4 - 11.05.2023
Dr. BANU REKHA B
Associate Professor,
PSG College of Technology,
Coimbatore
Topic: Radiation Protection

Day - 5 - 12-05-2023
Hindusthan Hospital Visit

Geo Tagged Photographs of Event

Patients with brain disorders

- Glucose is the main fuel of the brain. By attaching Radiotracers to glucose, the PET scan is able to detect which areas of the brain are utilizing glucose at the highest rates.
- PET scans of the brain are used to evaluate patients who have memory disorders of an undetermined cause, suspected or proven brain tumors or seizure disorders that are not responsive to medical therapy and are therefore candidates for surgery.
- A seizure is usually defined as a sudden alteration of behavior due to a temporary change in the electrical functioning of the brain. Normally, the brain continuously generates tiny electrical impulses in an orderly

Large Magnet

- The magnet is the most important and biggest part of the MRI device.
- It is this magnet that allows the MRI machine to produce high quality images.
- There is a horizontal tube that runs through the magnet and is called a bore.
- The magnet is extremely powerful and its strength is measured in either "tesla" or "gauss".

HISTORY OF X-RAY

In many languages, a radiation is referred to as Roentgen radiation, since the German scientist Wilhelm Roentgen, who discovered it in November 8, 1895.

In his laboratory he had set up experimental apparatus to investigate cathode rays having an experiment with vacuum tubes and Roentgen had used Roentgen made his immense discovery.

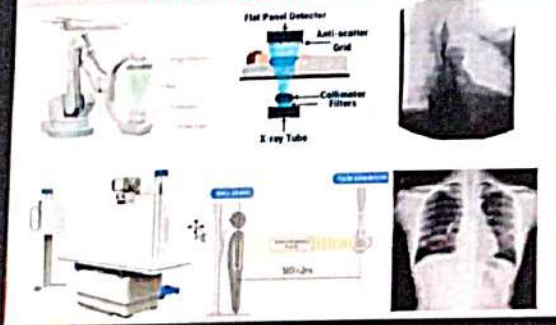

In the following day, Roentgen noticed that several crystals lying on the table began to fluoresce, as soon as the induction current was switched on.

Roentgen was able to investigate the permeability of materials between the tube and the screen finally he replaced a screen by a photographic plate.

A few days later, Roentgen made a photographic image of his wife's hand, using the new rays instead of light for the exposure.

- Human cells grow and multiply through a process called cell division to form new cells.
- When cells grow old or become damaged, they die, and new cells take their place.

Most of the time when people refer to "cell division," they mean mitosis, the process of making new body cells. Meiosis is the type of cell division that creates egg and sperm cells.

Types of Cell Division

MITOSIS

MEIOSIS

Normal Cell Division

Abnormal Cell Division

"tumour" or "neoplasm"

Sometimes this orderly process breaks down and cells grow and multiply when they shouldn't.

FDP - Radiological Equipment's - Day 4 Session 7-202...
Prof. A. Thiruganani

17:25 25.05.2023

Effects of Radiation

Somatic Effect

- Early somatic effect – Whole body / Partial body irradiation
- Late somatic effect - ~ 30 years

Typically, high doses delivered over several months enable repair mechanism of body to function fully.

Measured using Lethal Dose (LD):
LD 50/60 : Lethal dose to kill 50 people within 60 days

Hereditary Effect

- Deterministic / Stochastic
- Present knowledge related to animal studies

Any amount of dose brings a certain level of risk

These effects can be minimized by reducing the radiation below the threshold level.

• Early effects : Chromosome aberration, Temporary sterility, Sickness ~ Affecting CNS, coma, death etc.

• Late effects : Cataract, cancer
