

The office of Dean (Innovation, Incubation and Startup) is responsible for the implementation of the institute's overall innovation, incubation and entrepreneurship programmes which are focused towards advancement of human knowledge and development of society. Our main motive is to encourage entrepreneurial minds to steer their way into the future. We undertake the role of a mediator by helping developers become entrepreneurs by providing suitable guidance and connections. Our council members are notable leaders, educationists, philanthropists, industry experts, legal experts and developers, who have substantial experience in the start-up and research domains. We are committed to turning your vision into value. HICET offers infrastructure and facilities for incubating your ideas in to viable products. HICET arranges for grants to students, faculty, innovators from public who have ideas that are worth investigating. HICET mentors & advisors take the time to check up on and evaluate these ambitious plans before awarding funding – but only when they seem viable enough. This provides you with every opportunity to unleash your innovative potential which can further help the economy to grow and also in-turn aid the economy of the nation.
