Geo Tagged Photographs of Webinar :

This screenshot shows a Google Meet interface during a webinar. The main content area displays a slide titled "To make successful Entrepreneurs" with the following text:

- Passion:** without passion, you can't find motivation.
- What things give you the most joy in life? What are the actions, the people, the emotions and the things you enjoy the most?
- Every good entrepreneur has a tremendous passion for what they are doing – for changing the world with their products and services.

The slide is presented by P.SHAKTHIPRYA HICET STAFF EIE. The right sidebar shows a list of participants, including M.KARPAAGAM HICET STAFF, P.SHAKTHIPRYA HICET STAFF (Meeting host), P.SHAKTHIPRYA HICET STAFF (Presentation), P.SHAKTHIPRYA HICET STAFF (Meeting host), Prasanna kumar K, R.MADHU SUDHANAN HICET STAFF, R.VINOTH KUMAR HICET STAFF, and sridurga vimala. The bottom status bar shows the time as 12:19 and the date as 28-08-2021.

This screenshot shows a Google Meet interface during a webinar. The main content area displays a slide titled "10 characteristics of Entrepreneur" with the following list:

- #1. Unending Passion
- #2. The ability to stay motivated
- #3. Willingness to take and to tolerate risk
- #4. Being able to get along and to lead people
- #5. Openness to change
- #6. Toughness to keep moving Forward
- #7. Desire to compete and to win

The slide is presented by P.SHAKTHIPRYA HICET STAFF EIE. The right sidebar shows a list of participants, including D.LEIVASAGAM HICET STAFF, D.DHANALAKSHMI HICET STAFF, M.KARPAAGAM HICET STAFF, P.SHAKTHIPRYA HICET STAFF (Meeting host), P.SHAKTHIPRYA HICET STAFF (Presentation), P.SHAKTHIPRYA HICET STAFF (Meeting host), Prasanna kumar K, and R.MADHU SUDHANAN HICET STAFF. "Seek Opportunities to Learn"

OBJECTIVES OF PROGRAM

- A Business Mindset can help you achieve success in any field
- A business mindset refers to an individual who constantly strives to act as a leader
- This mindset focuses on creating value for the owner
- The business mindset encourages people to become entrepreneurs or better leaders
- "To Survive and Thrive, it develops the Growth Mindset. A growth mindset is "the belief that an individual's most basic abilities and skills can be developed through dedication and hard work brains and talent are just the starting point".

OUTCOME OF PROGRAM

- Confidence & Trust
- Relationship-building
- Listening
- Persuasion
- Product knowledge
- Identifying Customer Needs
- Handling questions and objections
- Identifying and presenting quality products for customers
- Verbal and Non verbal communication

REGISTRATION:

- Knock Google form on or before -14.12.2021
- Date of intimation (through the mail) -16.12.2021
- Last date of Registration form submission -18.12.2021

Propel to:

Dr.S.J.Narmadha
Department of Mechatronics Engineering,
Hindusthan College of Engineering & Technology
Valley Campus, Pollachi Highway,
Coimbatore -641 032.

For further details contact:

- Mr.M.M.Jegan/AP/MCT - 9789567111
(jegan@hicet.ac.in)
- Mr.P.Karthik/AP/MCT - 9629448799
(karthik.mcts@hicet.ac.in)

GUIDELINES: (First cum First Serve base)

- Maximum 4 members per team
- Maximum 2 teams per Department
- Registration fee per team Rs 100/- on that day
- The time of the event is 9.30 am to 3.00 pm
- Allotted space for team 10 * 10 feet
- One hour schedule for team to roam inside campus for product sale
- Bring the objective of the Product & investment details must be given at that time of registration form submission
- Bill book will be issued for each team

Report for National Level Technical Seminar on INDUSTRY 4.0 organized

Name of the Faculty : MUTHURAM G	
Department : EEE	Designation : ASSISTANT PROFESSOR
Name of the Event : National Level Technical Seminar On "INDUSTRY 4.0 - OPPORTUNITIES FOR STARTUP"	
Level : National	
Venue / Mode : CSE Seminar Hall, HiCET	
No. of Days : 01	Dates : 08 th April 2022
Funded by : IE I Student Chapter	
No. of Participants : 64	Registration charges (if any) : NIL
Name and Designation of Resource Person(s) : Dr. MOHANDAS R Industry 4.0 - Start Up Consultant, Embedded Systems Analyst, Zion Technologies, Bengaluru, Karnataka	
Outcome : Resource Person Dr Mohandas R had enough experience in Teaching and also Active member in EDC cell at his campus. During the event he shares about the STARTUP chances in India. During his speech he added Entrepreneurship is the art of starting a business, basically a startup company offering creative product, process or service. He said that it is an activity full of creativity. An entrepreneur perceives everything as a chance and displays bias in taking decision to exploit the chance. An entrepreneur is a creator or a designer who designs new ideas and business processes according to the market requirements and his/her own passion. To be a successful entrepreneur, it is very important to have managerial skill and strong team building abilities. Leadership attributes are a sign of successful entrepreneurs.	
Remarks and Feedback on the Event : Students are much interested to participate and also interacted with many queries and cleared their doubts. Resource person encouraged them to start a business after their study. Overall it was useful for our children who wish to take up challenges in their career.

Name and Designation of Resource Person(s): NA	

SLOGAN WRITING COMPETITION SUMMARY

On account of 75th Independence Day 15th August, 2022, Department of Agriculture Engineering conducted Slogan writing Competition "Pen to Sword" based on the theme – "Resolution to Shape India's Destiny on 13th August, 2022 through online mode. The competition was open Inter college level and approximately 30 students were showed interest and shared their slogans in Google drive link provided. The learners are instructed to portrair their slogan artistically and it considered as a great credit to win prices.

During the competition, the learners showed their great privilege and respect towards our country. Students from different religion, states contributed their esteem to this slogan competition.

The key directives for good slogan considered are:

- Slogan should be concise, catchy, timeless, unique, and original
- It should be credible, evoke emotions and create differentiation
- It should not contain any copyright issues.
- It should be quoted in inverted commas and should not exceed more than two lines

Objectives:

- To increase the observational skills of the students.
- To create awareness, and concern of the students towards global issues.
- To develop creativity among the students that should be related with their everyday experience.
- To upgrade and restore the ideas of golden- ager.

Outcome:

- Participants can explore the opportunity to exhibit their ideas based on the theme given.
- Participants can able to showcase their writing and artistic talents.
- Participants can inculcate the emotion of patriotism and resolutions to shape "India's Destiny"

Remarks and Feedback on the Event: Students have shown good interest and it was really focusing on their responses. Students are enthusiastic to participate and organize the similar events.

Plan of Implementing in HICET (if any): Planned to conduct the similar type of programmes in future.

Report for Webinar organized

Name of the Faculties : Ms. Chinju Saju, Mr. Dhayalan V.	
Department : Agriculture Engineering	Designation : Assistant Professors
Name of the Event: Entrepreneurship Oriented Processing Technologies in Coconut	
Level : College Level	
Venue / Mode: Online webinar through google meet link. Meet link: https://meet.google.com/kxw-kwtd-xfd	
No. of Days :1	Dates : 23-08-2022
Funded by : NA	
No. of Participants : 100	Registration charges (if any) : Nil
Name and Designation of Resource Person(s) : Dr. R. Pandiselvam, Scientist, Physiology, Kerala,	
<p>Session started at 9: 30 am. Welcome address is given by Mr. Dhayalan V., Assistant Professor, Department of Agriculture Engineering, HiCET. Dr. Sridhar N., HOD, Department of Agriculture has delivered the presidential address for the session. MoC team have introduced the Chief Guest, Dr. R. Pandi Selvam, Agriculture Research Scientist, CPCRI. Guest Speaker has introduced the importance of Entrepreneurship Development in the present scenario and potential of converting coconut into different emerging value added products. The few points he have expressed are given below:</p> <p>The value added products such as desiccated coconut powder, virgin coconut oil, coconut chips, coconut milk, preserved tender nut water & coconut inflorescence sap into coconut sugar is realized in view of globalization over the traditional processed products of copra and coconut oil. Value added food products from coconut can be broadly categorized as, those derived from mature coconut kernel, mature coconut water, tender coconut water, tender coconut kernel and coconut inflorescence sap.</p>	

Outcome :

- Participants get motivated to establish an enterprise by himself or herself with high productivity and low cost by getting a knowledge about the pathway to enhance the entrepreneurship by introducing the opportunities in processing technologies in coconut from the harvest to plate.
- Participants can explore the opportunities for self-employment and inculcate the spirit of 'Entrepreneurship'.
- Participants will obtain awareness about new technologies which are beneficial for developing a new enterprise.
- Development of the inner entrepreneurial potential of the students.

Remarks and Feedback on the Event:

Speaker delivered the spirit of agripreneurship among audience effectively. Students' feedback about the speaker and the topic is also excellent. Participants have even shown interest to participate the similar kinds of events in future also.

Plan of Implementing in HiCET (if any) :

- Planning to host EDC drives in the college for encouraging agri-preneurship.
- Planning to conduct a workshop related to "design thinking" for developing equipments related to post harvest technology with the same guest speaker.
- Planning to get an MoU with CPCRI with the motive of making use of laboratory, machinery and scientific assistance at the CPCRI for the beneficial of students to develop the projects.

REPORT FOR THE WEBINAR

Guest speaker have introduced so many opportunities in coconut processing and development of value added products in an excellent manner to motivate the young agripreneurs as well as the farming community. He have give the participant to explore about the machineries used, post harvest processes involved, nutritional aspects as well as cost analysis of various products developed in the CPCRI based on Agri Business Management. Some of the technologies and value added products that can be derived from coconut processing which involves Mechanization of farm operations, post harvest processing for value addition and product diversification are as follows:

1. **Neera Collection Technique:** Neera or inflorescence sap of coconut and other sap yielding plants is a healthy nutritious drink. It is the phloem sap collected from the spadix of the coconut plant. As it is rich in sugars, minerals, proteins, vitamins, antioxidants, volatiles etc., if it is left exposed to atmosphere it undergoes both enzymatic and microbial fermentation and become unsuitable for health drink or for value added products. At CPCRI, Kasaragod a simple device is developed to collect unfermented fresh and hygienic neera from coconut tree. The neera so collected can be used either as ready to serve drink or can be used for the preparation of natural coconut honey, jaggary or coconut sugar without the addition of any chemicals. The sequential tapping & nut production (SCTNP) technology i.e., 3/4th of the same spadix is tapped for neera and later it is opened for nut production, will increase the farm income without sacrificing the nut production.

Fig. 1 Developed Neera Collector

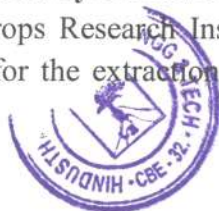

Fig. 2 Coconut Chips

2. Coconut Chips:

Coconut kernels undergo paring, slicing, blanching, osmotic dehydration and drying to become ready to eat chips. Frying is not undertaken in the chips making process. Using a new method of drying on the basis of osmosis, in which partial dehydration in sliced form is brought about by dipping the fresh kernel in sugar, salt or any osmotic solution followed by hot air drying. This is claimed to result in product with better flavour than freeze drying method at comparatively lesser cost. Hence, the resultant coconut chips give health promoting substances and do not pose any health hazard. Nutraceutical and medicated coconut chips can also be made by incorporating beet root, carrot, ginger and pepper. Central Plantation Crops Research Institute (CPCRI), a constituent of Indian Council of Agricultural Research (ICAR) and only coconut based research institution in India, has successfully developed a process protocol and machineries for the production of coconut chips.

3. Virgin coconut oil preparation by fermentation and Hot Process:

ICAR-Central Plantation Crops Research Institute, India, has designed and developed a virgin coconut oil (VCO) cooker for the extraction of oil by the hot process. However, a number of

VCO production processes being followed in India and elsewhere cause variations in the physicochemical properties, which in turn potentially affect the nutritional and medicinal properties of VCO. The physical and biochemical properties of VCO from the hot process (VCO-Hot), fermentation (VCO-Fer), expelled from dried gratings (VCO-EDG), centrifugation (VCO-Cen), and conventionally pre-pared copra coconut oil (CCO) were investigated in light of the design concept of the VCO cooker. The nutritionally important total phenolic content (mg GAE/100 g) and antioxidant capacity of all the VCOs were found to be in the range of 0.446 ± 0.041 (VCO-Cen) to 2.867 ± 0.152 (VCO-Hot) and 3.87 mM Trolox equivalent (TE) (VCO-Cen) to 11.31 mM TE (VCO-Hot), respectively. Multivariate analysis revealed that quality attributes viz., total phenol, total flavonoid, and cupric ion reducing antioxidant capacity of VCO-Hot defined by principal component 1. Hierarchical clustering showed that the VCO-Hot belonged to the group with high total phenolic and flavonoids content and strong antioxidant capacity. Comparative biochemical properties along with multivariate analysis differentiated the various VCO samples.

4. Snow Ball Tender Coconuts:

To make 'snow ball tender nut', the white kernel scooped out from the tendernut without shell with the water inside intact.

Snow Ball Tender Nut Machine

Application: To produce snowball tendernut from tender coconut.

Unit cost : Rs.20,000/-

Output capacity: Ten snowball tendernuts per hour

Fig. 3. Snow Ball Tender Coconut

Fig. 4 Coconut Frozen Delicacy

5. Coconut Frozen Delicacy

People are concerned with health related issues arising from consumption of ice cream and frozen delicacies for cholesterol and high calories. To meet the demand of health-conscious CPCRI developed the coconut frozen delicacy. Vegan Frozen Delicacy is made out of coconut milk, coconut sugar, tender coconut water and pulp.

6. Kalpa Bar Chocolate

Kalpa bar chocolate is moulded in 30 g packs and is a rich blend of pure cocoa and natural coconut sugar and has the delicious richness of dark chocolate. It does not contain any artificial ingredients.

7. Kalpa Crunch:

It is prepared from coconut residue obtained after extracting the coconut milk. In shape and texture wise it is similar to the product "Kurkure" of Pepsico company Ltd, but totally different in the content and taste. It is highly nutritious and healthy snack which will be preferred by all class of customers. It can be prepared in different flavours, as of now, CPCRI have developed tomato flavor, masala, sweet and coriander.

Fig.5 Chocolate developed from coconut

Fig. 6 Snack developed from coconut

These are some of the entrepreneurship related value added products and technologies delivered by the guest speaker during the webinar. Students also interacted with guest speaker and he clarified the doubts enquired by the students

Report for the Seminar organized

Name of the Faculty : Ms. Chinju Saju	
Department : Agriculture Engineering	Designation : Assistant Professor
Name of the Event: Seminar on "Student Innovation and Patent Awareness"	
Level : / College Level	
Venue / Mode: T-301/Physical Mode	
No. of Days : 1	Date : 27.08.2022
Funded by : NA	
No. of Participants :	Registration charges (if any) : Nil
Faculties 10	
Students 95	
Externals Nil	
Name and Designation of Resource Person(s) : Mr. Boobalan T., Assistant Professor (ECE), Innovation Ambassador, HICET	
Objectives: <ol style="list-style-type: none"> 1. To learn about awareness of intellectual property rights which helps innovators to protect their inventions and designs. 2. To get knowledge about IPR provides them with better collaboration and funding opportunities. 3. Young innovators need to know more about IP rules and rights. So this programme focused on giving the participants a better knowledge about IPRs especially patents. 	

Outcomes :

The main purpose of patent system is to encourage innovation and eventually results in technological development. The speaker enlightened the audience with the basic knowledge of Intellectual Property Rights focusing more on Patents and Copyrights. He emphasized that since the inventor obtains the exclusive right to the invention, the inventor can exercise this right by preventing others from commercially using the patented invention thereby reducing the competition and thus establishing a place in the commercial market. In the end the speaker solved various doubts raised by the audience and also discussed about the patience level required to file a patent since the duration required to get a grant is normally 3 years in India. The seminar was helpful to the faculties and students in following ways:

1. It helped the audience to know how to license a patent for others to use it or how you can sell it.
2. This seminar will give the students a view of the patent filing procedure in India.
3. It encouraged the students and faculty towards filing patents on their projects and future startups.

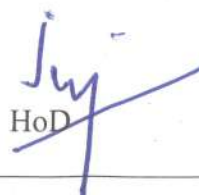

Remarks and Feedback on the Event:

Participants attended the seminar with eagerness and enthusiasm. They responded and interacted with guest speaker also. Excellent remarks was given by the participants in this regard and they have even requested to conduct workshops related to patent filing.

Plan of Implementing in HiCET (if any) :

- Planned to conduct a workshop on Intellectual Property Rights Execution for students.
- Planned to conduct an hands on training for the faculties as an FDP (Faculty Development Programme)

Report for Seminar organized

Name of the Faculty: Mr Dineshkumar M & Mr Rajkumar A	
Department: Chemical Engineering	Designation: Assistant Professor
Name of the Event: "Economic aspects and startup/ Career opportunities in Industries through computational Fluid Dynamic Softwares"	
Level: National Level	
Venue / Mode: CSE Seminar Hall, HiCET.	
No. of Days : 01	Dates : 27.08.2022
Funded by : Management	
No. of Participants : 142	Registration charges (if any) : NIL
Name and Designation of Resource Person: Dr P T Saravanakumar, Professor & Head, Department of Mechatronics Engineering, HiCET.	
Outcome: Dr P T Saravanakumar gave a little introduction about CFD modelling. Students able to gain knowledge about computational fluid dynamics software. Students could able to know that CFD is widely used in many automobile, aerospace, chemical, energy sector and weather forecasting. Students also understands CFD analysis, computer plays a vital role it involves both software and hardware. Students able to found that Many CFD analysis software's are available. Students learn that commercial software's are easy to learn for beginners as they provide a complete user guide, training materials with technical support. However, they have a high licensing fee. Some Open source CFD analysis tools (Open FOAM, Code Saturn) are freely available. This event help to gain idea how to get a job of CFD analysis in industries Some companies like ANSYS, COMSOL, and CONVERGE provide free licenses for academic purposes. Download the CFD analysis softwares. From their official website and start learning from basic tutorials. This event also helps to discuss the future of CFD engineers CFD is widely in many mechanical, chemical, and aerospace industries for design and analysis. Whenever there is research and innovation, CFD will be used in industries. Different jobs will be created as per type of work or expertise	
Remarks and Feedback on the Event: Event had a nice feedback of above satisfactory level.	
Plan of Implementing in HiCET (if any): Implemented in Mechatronics and Mechanical Engineering Department. Included in the Laboratory of Chemical Engineering syllabus.

Report for organized "CREATIVE THINKING"

Name of the Faculty : Mr.P.Karthik / Dr.T.Vandarkuzhali	
Department : Mechatronics Engineering	Designation : Assistant Professor
Name of the Event: "CREATIVE THINKING"	
Level : College Level	
Venue / Mode: ONLINE MODE	
No. of Days : 01	Dates : 29.08.2022
Funded by : NIL	
No. of Participants : 90	
Name and Designation of Resource Person(s) : RADHIKA AJ, ARTIST & FOUNDER, QUEENBEE CRAFTS & CREATIVE ARTS	
Objective: <p>Creative thinking (a companion to critical thinking) is an invaluable skill for college students. It's important because it helps you look at problems and situations from a fresh perspective. Creating thinking is a way to develop novel or unorthodox solutions that do not depend wholly on past or current solutions.</p> <p>Art and design stimulates creativity and imagination. It provides visual, tactile and sensory experiences and a special way of understanding and responding to the world.</p>	
Outcome : <p>In addition, Critical and Creative Thinking includes, but is not limited to, the following outcomes: Inquiry and Analysis; Problem Solving; Creativity; and Depth and Breadth of Understanding.</p>	
Remarks and Feedback on the Event: <p>A key aspect of entrepreneurship education is about imparting problem-solving skills. Beyond the world of jobs and businesses, these skills allow students to cope better with challenges in regular life.</p>	
Plan of Implementing in HiCET (if any) : <p>Similar programmes will be organised to promote entrepreneurship.</p>

Report for seminar organized

Name of the Faculty: Mr Dhineshkumar M & Ms Induja P	
Department: Chemical Engineering	Designation: Assistant Professor
Name of the Event: "Optimizing Innovation through Patent, Design and Trademark search"	
Level : National Level	
Venue / Mode: CSE Seminar Hall, HICET	
No. of Days : 01	Dates: 29.08.2022
Funded by : Management	
No. of Participants : 127	Registration charges: Nil
Name and Designation of Resource Person(s) : Mr. Prabhunarin S, Director & Head, IPR and Technology Development Division, Gagnant Financial & Legal Consultants LLP	
Objective: Students understand that the patent search is an examination performed by an inventor or their attorney to determine whether the invention is new, useful, and non-obvious. The patent search may also be done to determine the validity of issued patents and to identify which particular aspects of prior art are patented. Students learn that, to determine whether an invention is new, one must examine prior art to find similar references. Prior art includes anything public, anywhere in the world before the date of filing the patent application. This not only includes issued patents, but patent applications, printed material, internet articles anything that would teach the essential components of the invention. Students learn that computerized databases of patent information and specialized talents of dedicated patent searchers, a patent search can provide an inventor with a treasure trove of information related to their invention in the initial stages of application decision making. Furthermore, the lower cost of the patent search, relative to the much higher cost of the overall patent process is reason enough to hire a professional to complete the search.	
Remarks and Feedback on the Event: Event had a nice feedback of above satisfactory level.

Report for Seminar organized

Name of the Faculty :S. ShobhaChristila	
Department :EDC	Designation :Assistant Professor
Name of the Event:"Role of Biomedical Engineers In Bridging Innovations and IPR to the Healthcare System"	
Level : College Level	
Venue / Mode: Offline-Kurinji Hall	
No. of Days :1	Dates : 29.08.2022
Funded by : Institution funding	
No. of Participants :60	Registration charges (if any) :nil
Faculties 8	
Students 52	
Externals	
Name and Designation of Resource Person(s) : Mr.BoopathiSakthivel Founder, Prashan medical technologies ,Coimbatore	
Objective:The main objective of this seminar is a biomedical engineer is primarily concerned with solving problems; thus, specializing in the fields of biology and medicine, biomedical engineers focus on analysing challenges and designing efficient and effective solutions to improve quality of patient care.	
Outcome : After conducting the program the students will be able to Encourage creativity, self-learning and innovation (design of devices, components or processes that meet desired needs in Biology or Medicine) Develop awareness of the wealth of possibilities available to Biomedical Engineering graduates.	
Remarks and Feedback on the Event: The students gave very good feedback , they grasped your "thinking" and "execution up to the point" of the event correctly to be complete. They got awareness about how to become a biomedical engineer; it would be close to impossible for you to achieve that.	
Plan of Implementing in HiCET (if any) : Many programs related to Biomedical engineering product development and startup will be conducted in future.
