

HINDUSTHAN INNOVATIVE PRODUCT DEVELOPMENT CENTRE

Product Development Center aims to enable the students to enable enhancement of the engineering problem solving skill in them and to evolve into Skilled, Industry-ready Engineers. The center grooms them to possess strong fundamentals in their core subjects, analytical & innovative thinking, communication skills, acquaintance with Computer tools, familiarity with Industry Standards and passion for learning to drastically improve their employability. The hands-on training and learning by working on real life industry projects and product development, prepares the students for industry challenges ahead. Product development centre also provides consultancy services to the Industries by which solutions for industrial complications are fixed.

DEPARTMENT OF MECHANICAL ENGINEERING
