

MESSER POWERED THERMAL CUTTING LAB

Hindusthan college of engineering and technology in association with Messer cutting systems private limited, Coimbatore has setup the Messer powered thermal cutting lab on July 2017. The centre gives an idea on modern metal cutting technologies like oxy fuel flame cutting, plasma cutting and laser cutting process through virtual mode. In the virtual mode student can learn modern metal cutting process through television. Every semester students have been trained.

--Students got insight knowledge in the modern metal cutting process like oxy fuel flame cutting, plasma cutting and laser cutting process.

--Practical Knowledge on metal cutting process has been improved to meet the industrial requirements.
