Outcomes of the Event :

FIT INDIA Movement was launched on 29th August, 2019 by Hon'ble Prime Minister with a view to make fitness an integral part of our daily lives. The mission of the Movement is to bring about behavioural changes and move towards a more physically active lifestyle.

Being physically active can improve your brain health, help manage weight, reduce the risk of disease, strengthen bones and muscles, and improve your ability to do everyday activities. Adults who sit less and do any amount of moderate-to-vigorous physical activity gain some health benefits. Protect against many chronic diseases. Aid in weight management. Lower blood pressure and improve heart health.

There are five components of physical fitness: (1) body composition, (2) flexibility, (3) muscular strength, (4) muscular endurance, and (5) cardiorespiratory endurance. A well-balanced exercise program should include activities that address all of the health-related components of fitness.

Regular exercise may help ease depression and anxiety by: Releasing feel-good endorphins, natural cannabis-like brain chemicals (endogenous cannabinoids) and other natural brain chemicals that can enhance your sense of well-being.

Remarks and Feedback on the Event: To honour their dedication and commitment towards our mission, we recognise Sudeep Manwatkar as Fit India Ambassadors.

Plan of Implementing in HiCET (if any) : Conducting more no FIT INDIA Movement Program
